 - Coast to Coast GPRS network..
 - Very easy installation.
 - Free Mapping Software.
-

The MDT-214 is probably the most adaptable wireless messaging terminal available anywhere and offers features not found in terminals costing twice as much.

Datalink Systems Inc. in partnership with its resellers offers the MDT-214G/GPRS as a complete “end to end” solution ready to install and operate. The system as supplied includes an activated SIM card and wireless account, base mapping software and simple messaging software with canned messages from driver and free-form messages from dispatch to driver. The MDT-214 is also integrated with optional One-Touch Dispatch and Fleet Maintenance Software which can provide you with a very advanced digital Fleet Management system that can greatly increase your operating efficiency and possibly reduce your office staff.

The MDT-214 can also be configured for multi-network operation including satellite and local VHF/UHF trunked or point to point operation.

The MDT-214G/GPRS comes complete with dual GPS/GPRS antenna and mounting hardware, ready to install and operate with minimum cost.

***The MDT-214 is fully integrated with 1Plus Fleet Management Software to provide you with Dispatch Desk Software, Fleet Maintenance Software and Customer DataBase records.
